			Note: The chronology in this account starts in the middle, and goes back to the beginning, then starts in the middle again and goes forward in time. The verse numbers in this presentation will be seen starting with verse six and going down to one, then continuing from seven on to the end. To read the account in the order written, start at verse one and read up to six then read down from seven.	Note: Wisdom is speaking as a witness to the early stages. The accuracy of this account is amazing, as no life for a witness in that inhospitable environment. The intent is to show the LORD's wisdom in creating a habitable environment. This is a two pass Chronology. The first pass is more second in nature, a statement of what God did about creation. The second pass is more of a witness to the early stages of creation.

This account contains a series of mini-sequences, each one containing a separate	Note: This account is directly from God to Isaiah. It is God's version of a reverse chronology of three significant early events of creation, back from the laying of the mantle (foundation of the earth) to the "Big Bang" that started the universe.		Note: Jeremiah explains how the three different aspects of the nature of God took part in the creation.
